Anthesis

Join Anthesis as an Analytics Consultant – UK (Remote)

Are you passionate about data and analytics? Do you thrive in client-facing roles and enjoy solving complex business problems with smart, scalable solutions? Anthesis is looking for a talented Analytics Consultant to join our growing team and help deliver impactful cloud-based analytics projects.

About the Role

As an Analytics Consultant, you'll play a key role in full lifecycle implementation projects, working closely with clients to design, configure, and deliver tailored analytics solutions. You'll be part of a dynamic team, contributing across multiple projects and helping clients unlock the full potential of their data.

Location: UK – Work from Home

Reporting to: Solution Architect – Analytics

Staff Responsibility: None (Potential mentoring of junior consultants in future)

Key Responsibilities

- Lead and support client-facing analytics implementation projects
- Conduct data discovery and requirements gathering
- Design and configure client analytics solutions
- Deliver training to key and end users
- Provide consultancy and best practice advice
- Collaborate with functional consultants and support services
- Contribute to pre-sales and business development activities
- Ensure accurate reporting of time, expenses, and project status

What We're Looking For

Qualifications & Certifications

- Degree-level education
- Desirable: Microsoft Azure / Power BI certification
- Desirable: Infor Analytics / Birst certification

Experience

- Background in consulting or technology delivery (Data, Software, Cloud)
- Hands-on experience with data analytics tools and techniques
- Familiarity with Agile methodologies and stakeholder engagement

- Experience in industries like Food, Distribution, or Manufacturing is a plus
- Preferable experience with Microsoft and Infor (Birst) tech stacks

Skills & Knowledge
- Strong foundation in data governance, management, architecture, strategy, engineering, visualization, analytics, or AI
- Proficiency in SQL / BQL / DAX or similar
- Experience with Microsoft Azure / Power BI and Infor Analytics / Birst
- Data analysis, interpretation, and modelling skills

Attributes
- Excellent communication skills – both written and verbal
- Strong time management and ability to work under pressure
- Self-motivated and proactive team player
- Comfortable discussing technical topics with non-technical stakeholders
- "Roll-up-your-sleeves" attitude and a passion for getting things done

Additional Requirements
- Willingness to undertake further training
- Flexibility to work additional hours when needed
- Occasional travel for business purposes

Why Anthesis?
At Anthesis, we believe in empowering our people to grow, innovate, and make a difference. You'll be part of a collaborative environment where your ideas are valued, and your contributions drive real impact.

Ready to make your mark in analytics?

Apply now and become part of a forward-thinking team shaping the future of data-driven decision-making.
