Welcome to M3UG Denmark!

About Your Host

Rich Beattie – Solution Architect

- Worked with M3 since 2002
- Worked for 2 large UK M3 customers
- Worked for Intenia/Lawson Global Support
- Worked on behalf of Infor and Anthesis as an independent Business Consultant and Solution Architect for 15 years across the world
- Now proud to be Infor Solution Architect for Anthesis Global
- From Green Screen to CloudSuite, I've witnessed an extraordinary change in how businesses around the world use and interact with their ERP, so I'm glad to be here today to show you just how far we've come and what the future holds!

Making M3 CloudSuite Your Own

Exploring the ways in which you can make Infor M3
CloudSuite come to meet your day-to-day activities.

**Please note, this presentation does not contain the live demo recording. For a demo
please contact Anthesis.**

What We Hear

The feedback from Infor M3 users is consistent

Where Do I
Start?

Where am I?

How can I
see... ?

Too many
clicks!

Too slow!

Training
Material too
heavy

What's the Solution

The ANCHOR

Workspaces

- Every User needs a place to call home and anchor their workday.
- Delivered on via Infor Go or on the Desktop to see what your day ahead might look like.
- Bring attention to what hasn't happened, what's failed and what's been stopped for review.
- Provide navigation to your Focus, your work activities ... no more program codes!
- Consolidate information from across your enterprise in a single screen.

The FOCUS

Experience Designer (and SDK Applications)

- Information centres bringing Product, Customer and more information together in a single screen.
- Work In Progress dashboards to manage tasks and reduce navigation in M3.
- Focused single purpose process execution screen cutting out lengthy panel sequences.
- Actions performed by API's far quicker than a traditional user can action the same.

The CONTEXT

Insight Groups

- See In-Context information alongside M3 programs and experience designers to inform and support your daily tasks.
- Interactive and Detachable, making use of multi screens for users.
- Quick Switch of context widgets if your role or context needs changes through the day.

Why this is so important

Process Control

- Trigger that something hasn't started
- Trigger that process has failed
- Trigger that process has deliberately stopped for review

Manage User Adoption

- Slimmer Training Content
- Quicker Onboarding
- Simplicity and Task Efficiency

Preparing for What's Next

Augmented Intelligence

- Robotic AI
- Gen AI
- Agentic AI

Real World solutions for Real Users

The key to unlocking the ROI for your ERP Programme is ensuring that the business end users have a modern, simple and focused user experience which is tailored to their day-to-day tasks. Our experience with our customers is that by removing the 'ERP' from the ERP, engagement and adoption of the tool by the end users is far greater.

Thank you.
