Anthesis Integrate: **Making Tax Digital** **for IFS**

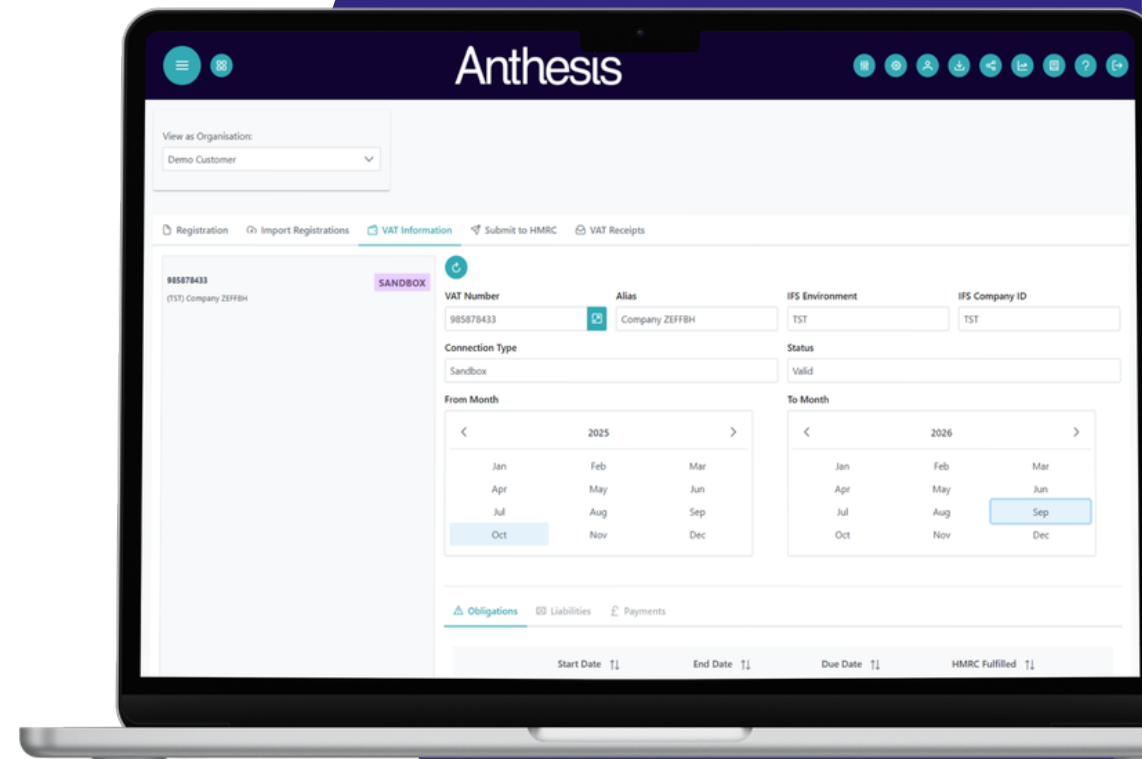

Anthesis

Anthesis Integrate: Making Tax Digital for IFS

Ensure HMRC compliance with simple,
automated VAT submission.

Our solution enables IFS customers to submit VAT returns directly to HMRC while maintaining full compliance with UK Making Tax Digital regulations. The solution is officially recognised by HMRC and integrates seamlessly with IFS financial processes.

Business challenges we solve.

Many organisations face challenges with:

- Manual VAT return preparation and submission.
- Re-keying data into HMRC systems.
- Increased risk of submission errors which result in fines.
- Maintaining compliance with evolving HMRC requirements.
- Supporting and managing multiple VAT-registered entities.

Our Solution.

Anthesis provides a complete software implementation package that enables:

- ✓ Direct digital VAT submissions to HMRC.
- ✓ Automated receipt and storage of HMRC responses.
- ✓ Support for monthly and quarterly VAT returns.
- ✓ Integration with standard IFS VAT functionality.
- ✓ Self-service with self-management of users, access and VAT registrations.
- ✓ Reduced manual processing and improved auditability.
- ✓ Submissions across multiple VAT registrations from one area.

Implementation services included.

Our initial consultation service provides:

1

VAT code review and configuration

2

VAT reporting template setup

3

Tax code mapping

4

Customer and supplier tax setup validation

5

End-to-end process testing

6

HMRC connectivity and authorisation config.

What are the benefits?

Compliance

Meets HMRC Making Tax Digital requirements

Efficiency

Eliminates manual re-keying of VAT data

Accuracy

Reduces submission errors

Automation

Streamlines VAT return processes

Auditability

HMRC responses stored digitally

Low Risk

Delivered by experienced IFS specialists

The result is a faster, simpler and more reliable VAT reporting process.
